100-word biography

My name is **Annette Dzudzor**, and I am a student who enjoys learning, growing, and exploring new ideas. I have a strong interest in technology and mathematics, and I enjoy challenging myself to understand difficult concepts. Outside of academics, I love creating content and coming up with fun, relatable ideas that

connect with people. I am a curious, hardworking, and creative person who believes in continuous self-improvement. I enjoy working with others, learning from different experiences, and taking on new opportunities. My goal is to keep developing my skills while making a positive impact wherever I go.

Driven by a passion for advanced technology and technical problem-solving, I **Abukari Issah Kangre**, a Computer Science student blending software development with extensive hardware expertise. As a certified HTML and CSS developer through Vodafone, I possess a strong foundation in front-end design, currently demonstrated by my leadership in a seven-member team building a dynamic perfume e-commerce platform. Beyond software, my deep understanding of hardware systems allows me to approach technology holistically, from code to physical components. I am dedicated to engineering efficient, scalable digital solutions and am actively open to connecting with fellow innovators.

My name is **Kelly Adoboe**, and I am a Level 200 Statistics and Computer Science combined major student at the University of Ghana. I have a growing passion for coding and technology, particularly in areas where computing and data can be used practically in the real world. I have foundational skills in Python and am continuously building on them through my studies. I am honored to be part of this group and look forward to collaborating, sharing ideas, and contributing positively to our work while learning from the experiences and contributions of my teammates.

My name is **Joel Asiedu**, and I am an ambitious Information Technology student specializing in Python development and system architecture. Driven by a passion for clean code, I have built a solid foundation in backend programming and data manipulation. Throughout my academic journey, I have focused on creating efficient, scalable software solutions and exploring database integrations. As the backend developer for this project team, I will be leveraging my Python expertise to build the core functionalities, handle logic implementation, and ensure smooth system operations while collaborating closely with my teammates to deliver a seamless, high-performing application.

I am **Sarfo Godlove Agyei** and a driven student pursuing a combined major in Computer Science and Statistics at the University of Ghana. With a deep passion for programming, I am actively building foundational skills in Java while exploring how data and technology intersect to solve real-world problems. My academic journey reflects a commitment to analytical thinking and innovative problem-solving. Beyond the classroom, I am dedicated to honing my craft and staying current with emerging technologies. Ambitious and determined, I aspire to become a skilled software engineer, leveraging my unique blend of statistical knowledge and programming expertise to make a meaningful impact in the tech industry

My name is **Ishawu Abdul Manaf**, and I am a Level 200 Information Technology student at the University of Ghana. I am passionate about software development, technology, music, and graphic design. My interests lie in applying computing and data-driven solutions to address real-world challenges and create meaningful impact. I have a solid foundation in Python programming and continuously work to strengthen my technical skills through academic studies and personal projects. I value creativity, collaboration, and continuous learning, and I am always eager to share ideas, contribute positively to team efforts, and learn from the experiences and expertise of others as I pursue both personal and professional growth.

Primary team contact: saedzudzor@st.ug.edu.gh

Deputy team contact: joasiedu011@st.ug.edu.gh

Team operation Agreement

- Communication platforms: WhatsApp
- Meeting times: Tuesdays and Saturdays
- Attendance rules:

1. attendance is mandatory

- 2.Members unable to attend must inform the team 6 hours before the meeting
- 3.Missing a meeting without notice counts as an unexcused absence
- 4.A different member records meeting's minutes each week
- 5.Meetings decisions, assigned tasks and deadlines must be documented and shared in the WhatsApp group

Work Division Process

Task Assignment

- * Tasks will be assigned based on members' skills, availability, and project needs.
- * Major tasks will be discussed and agreed upon during team meetings.

Task Completion

- * Members must complete assigned tasks before the agreed deadline.
- * If a member cannot complete a task, they must inform the team early enough for reassignment.

Review Process

- Every completed task must be reviewed by at least one other team member before being accepted.

Decision-Making Process

- * Decisions will be made through discussion during meetings.
- * If agreement cannot be reached, a majority vote will be used.
- * The Product Manager has the final decision on client-related matter

Conflict Resolution

If conflicts arise:

1. The affected members discuss the issue privately.
2. If unresolved, the matter is brought before the team.
3. The team leader mediates the discussion.
4. Persistent issues may be reported to the course instructor.

Consequences for Non-Participation

First Offence

- * Verbal warning.

Second Offence

- * Written warning recorded in meeting minutes.

Third Offence

- * Reduced ownership of project tasks and notification to all team members.

Repeated Non-Participation

- * The member may be reported to the lecturer with supporting evidence from GitHub commits, meeting attendance records, and task logs.

Academic Integrity

- All submitted work must be understood by the member responsible for it.
- * AI tools may be used only as assistance and not as a substitute for learning.
- * All AI usage must be documented in AI_USAGE.md.
- * Plagiarism, unauthorized copying, or misrepresentation of work is prohibited

Submission Process

Internal Deadline

* All deliverables must be completed 24 hours before the official submission deadline.

Final Review Team

* Documentation Lead prepares the final report.

* Two team members review the report.

* Product Manager confirms completeness.

Final Upload

* Documentation Lead uploads to Sakai.

* Develop lead confirms all required files have been pushed to GitHub

Version control rules (GitHub)

Branch Naming Convention

Examples:

feature/login-page
feature/inventory-module
bugfix/stock-calculation
docs/project-proposal

Commit Message Format

Examples:

Added inventory management page
Fixed login validation error
Updated project proposal document

Pull Request Rules

- No member may push major changes directly to the main branch.
- All significant changes must be submitted through a Pull Request (PR).
- At least one team member must review a PR before it is merged.

Repository Maintenance

- ☐ The repository must be updated regularly.
- ☐ Members should commit work frequently instead of uploading everything at the last minute.

Client and Problem Intake

Client Details

- Client Name: Yussif Kangre Abdulai
- Business Name: Yussif Kangre Abdulai
- Contact Method: whatsapp

Business Description

The client operates a perfume retail business and currently manages stock and sales records manually.

Problem Statement

The business lacks a centralized system for tracking inventory, sales, and customer information.

Proposed Solution

ScentHub will provide inventory management, sales tracking, and reporting functionality.

9:38 am

Today

Please send this to me on Whatsapp
I hope you're doing well. My perfume business is growing, and I think it's time to take it to the next level. I need a professional website where customers can browse my fragrance collection, check out the notes and longevity of the perfumes, and make purchases directly. Let me know when we can discuss the details and budget!"

11:44 am

Hi Yussif, hope you're having a great day! I was thinking about our conversation regarding your perfume business. You mentioned needing a website to showcase your collection

11:45 am

I'd love to help you build an e-commerce platform where clients can easily browse your scents, filter by fragrance families (like woody or oud notes), and place orders. Let me know when you're free this week so we can sit down and sketch out a plan!"

11:45 am

That sounds amazing! To be honest, you clearly know what you're doing, so you have my full go-ahead to just run with it and do everything. Let's skip the meeting for now so you can work your magic. Just send over a draft or a preview whenever you have something ready for me to look at!

12:01 pm

Kk Sir, we would surprise you with our excellence

REPOSITORY AND PLATFORM SETUP

Repository homepage:

TEAM.md file:

AI_USAGE.md file

Folder structure showing docs, presentations, videos:

Issue page with your issue:

The screenshot shows a GitHub issue page for the repository 'selasi07 / ScentHub'. The issue is titled 'Prepare D0 Team Charter #1' and is in the 'Open' state. The issue was opened by 'selasi07' and is currently owned by them. The description of the issue is 'Create and compile the D0 Team Charter report for submission.' Below the description, there is a section for 'Add a comment' with a text area and a rich text editor toolbar. The toolbar includes buttons for bold, italic, code, link, and other formatting options. At the bottom of the page, there is a 'Metadata' section with a sub-section for 'Assignees'.

AI Contract

We, the members of Team InnovateX, acknowledge that AI tools such as ChatGPT may assist with research, documentation, brainstorming, and coding support, but they cannot replace our understanding of the project. We agree to:

- Record AI use in AI_USAGE.md.
- Verify all AI-generated content before submission.
- Avoid uploading confidential client data to public AI tools.
- Ensure every member can explain their own work.
